Altivar AC Drives

Advanced energy management
and performance in motor control

schneider-electric.us/drives

Schneider Electric

Segment focused. Customer centric.

Schneider Electric can help you meet the challenges of the trends impacting our world. With a long history of industry-leading motor control solutions and a global footprint, we offer the right choices for motor controls from simple local applications to large global enterprise solutions.

5 Key trends shaping our world

1 **Urbanization**
Greater demand for water and wastewater solutions

2 **Industrialization**
Greater need for connectivity and automation

3 **Digitization**
Big data capability provides new avenues for efficiencies

4 **Scarcity of resources**
Demand for efficient use of resources

5 **Climate change**
Demand for sustainable development

The Altivar™ Drives family: The most advanced and user-friendly variable-speed AC Drives and Drive Systems offering on the market.

Featuring proprietary motor control algorithms to achieve optimal motor performance and complete scalability to match your application speed, size, and protection requirements, the complete line of Altivar products and solutions delivers the flexibility and performance to:

- Optimize a broad range of utility and industrial applications including pumps, fans, compressors, material handling, hoisting, packaging, and material working.
- Reduce your energy costs by using proprietary energy-saving technologies available only from Schneider Electric.
- Improve your uptime by simplifying installation, commissioning, and maintenance by providing advanced diagnostics, industry-leading voltage ride-through capability, and seismic-qualified products and solutions.

Improve your business operations with Altivar AC Drives

Schneider Electric offers a portfolio of AC Drives designed to provide value in your business operations.

Machine builders

- Space savings
- Certified safety connectivity
- Complementary product offers
- Automation network integration
- Process performance improvement

Building managers

- Energy savings
- Energy management
- Green building compliance
- Building network integration
- Ready-to-install

Industrial process owners

- Energy management
- Process optimization
- Predictive maintenance
- Remote network access
- Packaged drive systems

Utility site operators

- Process monitoring
- Energy management
- Sitewide network control
- Coordinated drive systems
- Chemical and air particle pollution resistance

For more than 30 years, Schneider Electric has supplied AC Drives to energy-intensive industries across the world. We are a global-leading supplier of reliable, high-performance AC Drives, built for a wide range of applications across diverse and demanding segments.

Altivar AC Drives for machines

Designed to assist OEMs, panel builders, and system integrators build tailored, high-performance equipment.

- Material handling
- Material working equipment
- Material forming and embossing
- Gappers, palletizing
- Packaging machinery
- Metal process machinery
- Hoisting
- Extruding
- pM motor control

Altivar Process Drives for industrial utility applications

Altivar process drives deliver added-value services to enable business and process optimization through improved life cycle asset management and optimized energy consumption. Designed to assist OEMs, system integrators, and industrial process owners, Altivar process drives improve process performance by enabling full information and operational technology convergence.

Embedded EcoStruxure Plant™ and Foxboro™ Evo architectures simplify system integration.

Water applications

- Booster pumps
- Lift station pumps
- Desalination pumps
- Water supply pumps
- Water suction pumps
- Progressing cavity pumps
- Influent and effluent pumps
- Secondary clean water pumps

Oil & Gas applications

- Rod pumps
- Feed pumps
- Pipeline, booster, and unloading pumps
- Water injection pumps
- Reciprocating and centrifugal compressors
- Progressing cavity pumps
- Electric submersible pumps

Mining & Metals applications

- Hoisting
- Crushers
- Extruding
- Conveyors
- Slurry pumps
- Induced draft fans
- Quenching pumps
- Dust collection fans
- Mine ventilation fans
- Hydro-transport pumps

Altivar Drive Systems for industrial process utility

Schneider Electric configurable packages and systems that deliver high performance across multiple segments.

Water

It is estimated that 15% of worldwide water use is industrial. All industries rely on the unlimited availability of water required for processes that control flow and pressure through large pumps.

Power

Market pressure and rising costs require producers to convert a larger share of fuel into sustainable kilowatt hours. Operating optimization is key to cost-effective production.

Oil & Gas

Complex operations and harsh environments put high demand on most chemical and oil and gas process equipment. Achieving high efficiency and availability is critical to increased output and improved product quality.

Mining, Minerals & Metals

Sustainable growth is a major challenge as demand exceeds supply and new deposits are in increasingly remote regions. Processes need to improve efficiency and safety while reducing environmental impact.

Benefits

- Energy savings
- Improved process reliability
- Accurate flow and pressure control
- Soft starting & stopping
- Reduced lifecycle costs
- Extended equipment life

- Increased process efficiency
- Reduce emissions
- Improved heat rate
- Higher plant availability
- Improved process control
- Less energy consumption

- Helps keep costs under control
- Lower maintenance costs
- Simple and effective process control
- Operate equipment at optimum set point

- Better cost-control of energy intensive applications
- Improved heat rate
- Efficient control of large fans and pumps
- Replace older hydraulic and mechanical controls

Features

- Access to real-time data
- QR codes to access support
- Innovative tools and diagnostics
- Powerful user interfaces
- Flexible communications
- Easy-to-maintain designs
- Full array of support services
- Built-in pump protection functions
- Multiple configurations and options

Altivar Drive Systems for industrial process and utility

AC drive platform packages configured, optimized, and engineered to order for your business.

Water applications

- Influent and effluent pumps
- Booster pumps
- Secondary clean water pumps
- Desalination pumps
- High-service pumps
- Water supply pumps
- Water suction pumps

Oil & Gas applications

- Rod pumps
- Feed pumps
- Electric submersible pumps
- Pipeline, booster, and unloading pumps
- Reciprocating and centrifugal compressors
- Water injection pumps
- Progressing cavity pumps

Mining & Metals

- Conveyors
- Furnace fans
- Slurry pumps
- Induced draft fans
- Quenching pumps
- Dust collection fans
- Mine ventilation fans
- Hydro-transport pumps

Power Generation applications

- Dust collection fans
- Induced and forced-draft boiler fans
- Feed water, cooling, circulation, and condensate pumps
- Reactor recirculation pumps

Solutions for every stage of your equipment's life cycle

Life Is On

At Schneider Electric, we take a long-term, holistic approach to determine your facility and operational needs, then develop strategies to improve the performance of your people, systems, and processes.

Our expertise enables you to cut costs, reduce energy consumption, and keep your systems up and running through routine maintenance, process enhancements, and migrations to new, state-of-the-art functionality.

Start-up and commissioning

- Expert installation support service, comprehensive power-up, and diagnostic check on system components

Industrial repair services

- Repair capabilities for more than 400,000 part numbers from more than 2,500 manufacturers at our Greensboro, NC facility

Technical training

- Training offered on-site, off-site, and online for Schneider Electric drives products taught by professional instructors

Spare parts management

- On-site assessment to determine parts/inventory needs to ensure proper system operation and reduce downtime/costs

Remote technical support

- Comprehensive online and phone support from experts trained on Schneider Electric drives products

Migration and modernization

- Process optimization through the identification/replacement of legacy products for new, innovative technology while maximizing existing hardware for cost-effective solutions

On-site technical support

- Regular maintenance, upgrades, and conversion assistance, small application/programming assistance, troubleshooting, and repair — even in emergencies

Software renewals

- Access to the latest software available to ensure optional functionality for your system

Preventive maintenance

- Programs to proactively detect potential system issues to help avoid costly unscheduled downtime and reduced equipment life

Extended warranty

- Protection plans tailored to your needs to reduce costs and out-of-service time

More information

For more detailed information, including product specifications, please visit altivardrives.com.

When it comes to your process equipment, we can help at each point

- Personalized assessment, system design, and consulting
- Expert installation and new system start-up assistance
- Regular maintenance, repair, support, and troubleshooting
- Cost-effective modernization of legacy equipment
- Timely upgrades and conversion assistance to new equipment
